About Me

I am Mohammad Shoari, a front-end developer with over three years of experience in designing and implementing modern, responsive user interfaces.

Beyond coding, I am passionate about user experience (UX) design and creating interfaces updated with the latest design systems, always striving to balance aesthetics and functionality.

Teamwork and problem-solving are among the skills that have helped me achieve the best results in various projects. My goal is to grow in the front-end development field and turn ideas into real, high-quality products.

Experience

Naaji Secure Development Technologists

November 2023 – Present (1 year 7 months)

In this company, I have been responsible for developing the National Alert System and a set of organizational systems using ASP.NET and React technologies.

Tehran

Front-End Team Lead

December 2024 – Present (11 months)

- Zabbix-based monitoring system
- Developed a modern, multilingual UI using React, TanStack Query, Typescript and Tailwind, significantly improving dashboard usability and user experience.

Hoshdaar

- A national cyber-alert and monitoring platform that identifies vulnerabilities, analyzes malware.

Front-End Developer

November 2023 – July 2024 (8 months)

iTeller - (remote)

January 2025 – Present (1 year 11 months)

At iTeller.io, I worked on developing a seamless cryptocurrency exchange experience. The company operates within a legal framework across multiple countries (Australia, the United Kingdom, UAE).

Another project I contributed to was Camel Coin, developed on the Web3 platform. Both projects were built using Next.js.

UAE

Freelance Projects

April 2022 – Present (3 years and 8 months)

Delivered various web development projects for clients, focusing on modern UI, clean code, and reliable functionality.

Tehran
